METHODS

Introduction to Social Research

300-1R1-DW | 45 hours

No prerequisite

Section 03001 Tuesday 18:00 – 21:00

Section 03002 Wednesday 18:00 – 21:00

Introduction to Social Science Research (IR) is the first of the four methodology courses and is normally taken in the student's first term of the program. The goal of the course is to develop and apply appropriate work methods to the social science disciplines. Students learn and practice skills such as accessing and organizing relevant information, using appropriate technologies, identifying academic and non-academic sources, evaluating the reliability of the sources, summarizing an author's main idea, citing sources, building a bibliography, communicating their ideas orally and in writing, and effectively working in a group. This course establishes a practical foundation for successful and ethical work in the social sciences and is the pre-requisite for the two methodology courses that follow: Qualitative Methods and Quantitative Analysis.

Research Methods

300-300-DW | 60 hours

No prerequisite

Section 03001 Monday 18:00 – 22:00

You must be preregistered in this course by an Academic Advisor. Please send an email to conted@dawsoncollege.qc.ca with your Dawson student number if you require this course this semester.

This is the first of the three methodology courses and is normally taken in the student's second term of the program. The goal of the course is to apply the scientific approach to the various social science disciplines. Students identify a research problem and follow the steps to select a research method appropriate to the problem, produce a data collection tool, collect, analyze and interpret the data. The culmination of the process is a research report that presents the research steps in the context of a brief literature review of the topic. Approximate cost of textbook and materials: \$65-\$120.

Quantitative Methods

360-300-DW | 60 hours

Prerequisite: Research Methods 300-300

Section 03001 Thursday 18:00 – 22:00

This is the second of the three methodology courses. It builds on the introduction to social science research covered in Research Methods. This course teaches students to apply statistical tools to the interpretation of data related to contexts of study in the field of social science. The focus of the course is on the analysis of quantitative data as part of the scientific approach. Areas examined are identification of variables, presentation of data, analysis of data using various forms of measurement, determining the nature and link between variables, and estimating the parameters of a given population based on the corresponding statistics obtained from a sample. Approximate cost of textbook and materials: \$65 - \$120.

Integrative Seminar

300-308-DW | 60 hours

300-303-DW | 45 hours

Prerequisite: Research Methods 300-300-DW and Quantitative Methods 360-300-DW

Section 03001 Friday 18:00 – 22:00

The Integrative Seminar is for students planning to complete a DEC in Social Science *this semester*. You must be preregistered in this course by an Academic Advisor. Please send an email to conted@dawsoncollege.qc.ca with your Dawson student number if you require this course for graduation this semester.

Students in the Social Science Program take this course in their final term after having passed Research Methods (300-300-DW) and Quantitative Methods (360-300-DW). The Integrative Seminar provides the student with an opportunity to consider how the various social sciences can work together to contribute to understanding social phenomena. Using multiple social science disciplines, students will explore a topic related to the seminar theme in a series of distinct stages, ultimately producing a long essay on this exploration. This integrative project will address some of the linkages and differences among social sciences and show how their combined use makes for a deeper understanding of the selected topic. Approximate cost of materials: \$0-\$75.

PHILOSOPHY

Introduction to Philosophy - Philosophy of Death

340-1N1-DW | 45 hours

340-101-DW* | 45 hours

No prerequisite

Section 03001 Thursday 18:30 – 21:30

In an ancient philosophical dialogue called the *Phaedo*, Socrates explains that “the one aim of those who practice philosophy in the proper manner is to practice for dying and death” (64a 3-4). The aim of this course is to try to make sense of this claim by looking at how questions about death and dying have been central to the development of philosophical thought from Ancient Greece to modern times. Since this is an introductory course, students will also be taught the fundamentals of sound philosophical argumentation. Students who successfully complete this class will have a sense of the major periods of western philosophical thought, the most important questions associated with the theme of death, and why the philosophical study of death is relevant and necessary today.

*Only students in the 300.CE program should register for course number 340-101-DW.
