

Mathematics Department
201-NYB-05 Calculus II
Commerce

Course Objectives:

This course introduces the student to Integral Calculus, to the techniques of integration and to some of the applications of integration to physical problems. Another look at limits and an introduction to the topic of infinite series are included.

Course Competencies:

This course will allow the student to fully achieve the competency:

022Y: To apply methods of integral calculus to the study of functional models in the field of Social Science.

Elements of the Competency:

1. To situate the historical context of the development of integral calculus.
2. To find the indefinite integral of a function using integration techniques.
3. To calculate the definite integral of a function on an interval and provide its interpretation.
4. To calculate the limits of a function with indeterminate forms using L'Hôpital's rule.
5. To calculate the improper integral of a function on an interval and provide its interpretation.
6. To analyze a phenomenon using differential equations with separable variables.
7. To analyze a phenomenon by checking for convergence of a series.

This course contributes to the partial achievement of the competency:

022S: Apply concepts related to Social Science disciplines to the understanding of the human phenomena in concrete situations.

Elements of the Competency:

1. To identify concrete situations that lend themselves to study.
2. To use concepts applicable to these situations.
3. To use a strategy appropriate to the study of these situations.

Pre-Requisite:

Calculus I (201-NYA-05 Commerce) or equivalent.

Pondération: 3-2-3

Evaluation Scheme and Schedule:

The Institutional Student Evaluation Policy (ISEP) is designed to promote equitable and effective evaluation of student learning and is therefore a crucial policy to read and understand. The policy describes the rights and obligations of students, faculty, departments, programs, and the College administration with regard to evaluation in all your courses, including grade reviews and resolution of academic grievance. ISEP is available on the Dawson website.

Term Work:

A minimum of 3.5 hours of in class testing is required.

Final Examination:

The Final Examination will be a supervised, comprehensive examination held during the formal examination period.

Grading Policy:

The final grade is the greatest between:

Option A

- | | |
|--|-----|
| 1. Term Mark (tests, quizzes, assignments) | 50% |
| 2. Final Examination | 50% |

Option B

- | | |
|--|-----|
| 1. Term Mark (tests, quizzes, assignments) | 25% |
| 2. Final Examination | 75% |

To pass the course the students must obtain at least 60%.

Required Text and Materials:

Text: The required text is Applied Calculus for the Managerial, Life and Social Sciences, Tenth Edition, by S.T. Tan, Brooks/Cole Publishers

- References:**
- 1) Calculus with Applications, by Lial, Greenwell, Ritchey, Seventh Edition, Addison Wesley
 - 2) Brief Calculus: An Applied Approach, Sixth Edition, Ron Larson and Bruce Edwards, Houghton Mifflin
 - 3) Single Variable Essential Calculus: Early Transcendentals 2nd Edition by James Stewart

Calculators: Students are only permitted to use the Sharp EL-531X, XG or XT calculator during tests and examinations.

Teaching Methods:

Lectures and problem sessions

Course/College Policies

ISEP Statement:

The Institutional Student Evaluation Policy (ISEP) is designed to promote equitable and effective evaluation of student learning and is therefore a crucial policy to read and understand. The policy describes the rights and obligations of students, faculty, departments, programs, and the College administration with regard to evaluation in all your courses, including grade reviews and resolution of academic grievance. ISEP is available on the Dawson website.

(<https://www.dawsoncollege.qc.ca/governance/institutional-student-evaluation-policy/>)

Attendance and Course Participation Requirements:

Students should refer to the Institutional Student Evaluation Policy (ISEP section IV-C) regarding attendance.

Attendance is recommended for the successful completion of the course.

Literacy Standards:

Problem solving is an essential component of this course. Students will be expected to analyze problems stated in words, to present their solutions logically and coherently, and to display their answers in a form corresponding to the statement of the problem, including appropriate units of measurement. Marks will be deducted for work which is inadequate in these respects, even though the answers may be numerically correct.

Student Conduct:

- a) Students have an obligation to arrive on time and remain in the classroom for the duration of scheduled classes and activities.
- b) Students have an obligation to write tests and final examinations at the times scheduled by the teacher or the College. Students have an obligation to inform themselves of, and respect, College examination procedures.
- c) Students have an obligation to show respectful behavior and appropriate classroom deportment. Should a student be disruptive and/or disrespectful, the teacher has the right to exclude the disruptive student from learning activities (classes) and may refer the case to the Director of Student Services under the Student Code of Conduct.
- d) Electronic/communication devices (including cell phones, mp3 players, etc.) have the effect of disturbing the teacher and other students. All these devices must be turned off and put away. Students who do not observe these rules will be asked to leave the classroom.

Everyone has the right to a safe and non-violent environment. Students are obliged to conduct themselves as stated in the Student Code of Conduct and in the ISEP section on the roles and responsibilities of students. (ISEP section II-D)

Academic Integrity:

I) Cheating in Examinations, Tests, and Quizzes

Cheating includes any dishonest or deceptive practice relative to formal final examinations, in-class tests, or quizzes. Such cheating is discoverable during or after the exercise in the evaluation process by the instructor. Such cheating includes, but is not limited to:

- a) Copying or attempting to copy another's work.
- b) Obtaining or attempting to obtain unauthorized assistance of any kind.
- c) Providing or attempting to provide unauthorized assistance of any kind.
- d) Using or possessing any unauthorized material or instruments which can be used as information storage and retrieval devices.
- e) Taking an examination, test, or quiz for someone else.
- f) Having someone take an examination, test, or quiz in one's place.

II) Unauthorized Communication:

Unauthorized communication of any kind during an examination, test, or quiz is forbidden and subject to the same penalties as cheating.

III) Plagiarism on Assignments and the Comprehensive Examination

Plagiarism is the presentation or submission by a student of another person's assignments or Comprehensive Examination as his or her own. Students who permit their work to be copied are considered to be as guilty as the plagiarizer.

IV) Penalties

Cheating and plagiarism are considered extremely serious academic offences. Action in response to an incident of cheating and plagiarism is within the authority of the teacher.

Penalties may range from zero on a test, to failure in the course, to suspension or expulsion from the college.

According to ISEP, the teacher is required to report to the Sector Dean all cases of cheating and plagiarism affecting a student's grade. (See ISEP section V-C.)

Intensive Course Conflicts & Policy on Religious Observance:

If a student is attending an intensive course, the student must inform the teacher, within the first two weeks of class, of the specific dates of any anticipated absences.

Students observing religious holidays must **inform** each of their teachers, in writing, of the specific dates as soon as possible, but **no later than the end of the second week of the impacted semester or term.**

Alternative arrangements convenient to both the student and the teacher must be made at the earliest opportunity. In the event that the date of a religious observance has yet to be determined, students must submit the name of the observance to their teachers and provide them with the specific date(s) as soon as it becomes available. This applies both to the semester or term, as well as to any final examination period. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, nor be penalized for their absence.

It must be emphasized, however, that this College policy should not be interpreted to mean that a student can receive credit for work not performed. It is the student's responsibility to fulfill the requirements of the alternative arrangement. (ISEP Section IV-D)

A form for this purpose is available at the end of this document.

Math Tutorial Room:

Volunteer math teachers are available for help in room 7B.1 from 10:00 to 16:00 (Monday through Friday) and from 17:00-18:00 (Monday through Thursday).

Course Content & Tentative Schedule (see next page):

(Number of classes listed is approximate)

Specific Competencies	Learning Activities	Sections & Problems / Tentative Schedule
Antiderivatives Reimann Sums The Fundamental Theorem of Calculus	<ul style="list-style-type: none"> - Find the area under a simple curve using Riemann sums. - Definite Integral as the limit of a Riemann sum. - Fundamental theorem of Calculus. - Substitution Method - Average Value of a Function. 	Chapter 6: 4 WEEKS §6.1: Antiderivatives and the Rules of Integration, p 418-419: 1-62 §6.2: Integration by Substitution, p 430-431: 1-54 §12.4: Integration of Trigonometric Functions, p830: 1-10,15-18, 21-28 §6.3: Area and the Definite Integral, p 442-443: 3-10,13-16 Class Note 1: p279-280: 1,3, 15-23, 25,26, 29-41 §6.4: The Fundamental Theorem of Calculus, p 453: 1-40, p830:11,12 Class Note 2: p298, 1-12 §6.5: Evaluating Definite Integrals, p463:1-44; p830: 13,14,19,20,28-30, Review p496-497: 1-36
Techniques of Integration	<ul style="list-style-type: none"> - Integration by Parts - Trigonometric Integral using Identities - Trigonometric Substitutions - Partial Fractions 	Chapter 7: 6 WEEKS §7.1: Integration by Parts, p507: 1-20, 23-38 Class Note 3: Trigonometric Integrals and Trigonometric Substitutions p326: 1-16,43,45,46,49,52,53,55,58 Class Note 4: Partial Fractions: Handout
Numerical Integration	<ul style="list-style-type: none"> - Approximate certain integrals using Simpson's Rule 	§7.3: Numerical Integration
Indeterminate Forms and L'Hopitals Rule	<ul style="list-style-type: none"> - Evaluate Limits of Indeterminate Forms using L'Hopital's Rule 	Class Note 5: Indeterminate Forms and L'Hopital's Rule p197: 1-36
Improper Integrals	<ul style="list-style-type: none"> - Determine the Convergence of Improper Integrals 	§7.4: Improper Integrals, p539-540: 15-42 Class Note 6 p360: 23-28; Review p550: 15-20
Applications of Integration	<ul style="list-style-type: none"> - Extend the notion of the Definite Integral to calculate: - Area bounded by curves - Consumers' and Producers' Surplus - The volume of a solid of revolution: disk, washer 	§6.6: Area Between Two Curves, p 475-476:1-42; p830: 33-38 §6.7 Applications of Definite Integrals to Business and Economics, p490-491: 1-10 §7.5: Volumes of Solids of Revolution, p547: 1-30
Differential Equtions	<ul style="list-style-type: none"> -Verify proposed solutions to differential equations -Solve first order separable differential equations 	Chapter 9: 1 WEEK §9.1 Differential Equations, p649: 1-18 §9.2 Separation of Variables, p655: 1-10,17-25
Infinite Sequences	<ul style="list-style-type: none"> - Convergence or divergence of Infinite Sequences 	Chapter 11: 4 WEEKS §11.2 Infinite Sequences, p742: 1-43
Infinite Series	<ul style="list-style-type: none"> - Sum of an infinite series from the definition. - Geometric and Telescoping series: applications - Tests for convergence of series: <ul style="list-style-type: none"> -Integral test, Comparison and Limit Comparison Tests, -Ratio and Root Tests, Alternating Series Test, -Absolute Convergence -Interval of convergence of a power series 	§11.3 Infinite Series, p753: 1-30 §11.4 Series with Positive Terms, p763: 1-50 Class Note 7: p463: 19-36; Class Note 8: p469: 5-15; Review p793-794: 11-32
Taylor and MacLaurin Series	<ul style="list-style-type: none"> - Finding the Taylor and MacLaurin series using their definition. 	§11.1 Taylor Polynomials p 733-734: 1-20 §11.5 Power Series and Taylor Series p773: 21-30 (series only) Review, p 793-794: 1-4, 37-40

RELIGIOUS OBSERVANCE/ INTENSIVE COURSES FORM

Students who intend to observe religious holidays or who take intensive courses must inform their teachers in writing as prescribed in the ISEP Policy on Religious Observance. (ISEP Section IV-D)

The following form must be submitted within the first two weeks of classes.

Name: _____

Student Number: _____

Course: _____

Teacher: _____

Date:

Description:

_____	_____
_____	_____
_____	_____
