

PHYSICS
Analytical Chemistry
Applied Optics
203-924-DW (all sections)
Winter 2019

Teacher	Basim Assaf 7A.14, local 4011, physicsone@gmail.com								
Pre-requisites	High School Sec IV Science 558-404 or 402, or Physical Science 436 or CEGEP 982-003-50								
Co-requisites	None								
Ponderation	2-3-3 (2 hours of lecture, 3 hours of labs, and 3 hour of work outside class per week)								
Course objectives	This is the first physics course for students in the Analytical Chemistry program. The primary aim of the course is to acquaint students with the basic concepts required to understand the optical properties of the equipment used in Analytical Chemistry.								
Course competencies	This course will allow the student to partially achieve the following competency: 01DR: To understand how equipment operates. Elements of competency: 4. To explain the operation of the equipments optical components. 5. To establish links between the operation of the equipment and the main detectors used.								
Evaluation	The Institutional Student Evaluation Policy (ISEP) is designed to promote equitable and effective evaluation of student learning and is therefore a crucial policy to read and understand. The policy describes the rights and obligations of students, faculty, departments, programs, and the College administration with regard to evaluation in all your courses, including grade reviews and resolution of academic grievance. ISEP is available on the Dawson website. <table border="0" style="margin-left: 20px;"> <tr> <td>Assignments</td> <td style="text-align: right;">10%</td> </tr> <tr> <td>Laboratory activities and projects[†]</td> <td style="text-align: right;">30%</td> </tr> <tr> <td>Class tests</td> <td style="text-align: right;">30%</td> </tr> <tr> <td>Final exam</td> <td style="text-align: right;">30%</td> </tr> </table> <p>[†]Your teacher will provide a tentative test schedule during the first week of class.</p> <p>In order to pass the course, students must show a basic understanding of the course material at the level covered in the lectures and in the lab. This is achieved by attaining a final grade of at least 60%, calculated according to the evaluation scheme above. Note: course work not submitted by the due date may be penalized at the teacher's discretion.</p>	Assignments	10%	Laboratory activities and projects [†]	30%	Class tests	30%	Final exam	30%
Assignments	10%								
Laboratory activities and projects [†]	30%								
Class tests	30%								
Final exam	30%								
Reference materials	<ol style="list-style-type: none"> 1. College Physics by Serway, Faughn & Vuille, 8th edition, Brooks Cole. 2. Basic Physics Express: Optics and Waves, iTunes. 3. College Physics by Urone, Thomson Publishing. 4. Additional online notes supplied by instructor. 								
Teaching methods	The material will be presented using a mix of active learning activities, lectures, in-class problem solving, laboratory experiments and demonstrations. Laboratory periods will be used for experiments as well as class tests and lectures.								
Attendance & participation	Although class attendance is not compulsory, students should make every effort to attend all classes. In the event that a class is missed, the student is responsible for all material covered or assigned during that class. Attendance during laboratory experiments and for class tests is however compulsory. In the rare event that a student for valid reason (<i>e.g.</i> due to an intensive course, illness, <i>etc.</i>) is or anticipates to be absent during a laboratory experiment or for a class test, the student must , where possible, inform the teacher and provide the necessary documents before the absence or, at the latest, on the day of their return. If the absence is excused, students will have the opportunity to complete the assessment. All other assessments (readings, quizzes, lab activities, <i>etc.</i>) missed due to absence are: <ul style="list-style-type: none"> • assigned a grade of zero where the absence is not excused; • given zero weight in the calculation of the final grade where the absence is excused. For additional information regarding attendance, students should refer to the Institutional Student Evaluation Policy (ISEP section IV-C).								

Literacy standards

It is expected that students will be able to comprehend the course material and express themselves appropriately as a normal part of their academic performance in the course. Marks may be deducted for inadequate communication skills.

Laboratory work

Experimentation is an essential part of science. Students will be expected to perform experiments and report on their results. Your teacher will provide you with instructions for lab experiments and activities (there is no manual to purchase). **Students must be present during the entire lab activity to receive credit.**

Student conduct

Everyone has the right to a safe and non-violent environment. Students are obliged to conduct themselves as stated in the Student Code of Conduct and in the ISEP section on the roles and responsibilities of students (ISEP section II-D). Disruptions or excessive noise will not be tolerated. Students who do not comply with these rules will be asked to leave the class and may be referred to Student's Services for disciplinary action. **Mutual respect is the key to a harmonious learning environment.**

Academic integrity

Cheating, copying, or any other form of academic dishonesty will not be tolerated. Students should acquaint themselves with the policy of the College on plagiarism and cheating. According to ISEP, the teacher is required to report to the Sector Dean all cases of cheating and plagiarism affecting a student's grade (ISEP section V-C). The usual penalty for the first instance of cheating will be a grade of zero for the piece of work in question to all parties involved (under certain circumstances, even a first offence may be penalized by failure in the course). A second offence may result in the failure of the course. Students should note that using someone else's laboratory data without authorization from the student and the teacher is cheating.

Intensive course conflicts

If a student is attending an intensive course, the student must inform the teacher, within the first two weeks of class, of the specific dates of any anticipated absences.

Policy on religious observance

Students who intend to observe religious holidays must inform their teachers, in writing, within the first two weeks of the semester as prescribed in the ISEP Policy on Religious Observances. (ISEP, Section IV D). This includes any religious holidays that occur during the final exam period. Please refer to the academic calendar for the exact dates. Forms for this purpose are available from your teacher. Your teacher will inform you of any modifications to planned course activities resulting from the teacher's own religious commitments.

Course content

Weeks	Topics
1-2	Oscillations and Simple Harmonic Motion
3	Waves
4	Electromagnetic Waves, Generation and Detection, The Electromagnetic Spectrum
5	Geometric Optics, Reflection, mirrors
6	Test 1
7	Prisms, Refraction, Lenses
8	Polarization
9	Color and Filters
10	Optical Instruments
11	Interference and Diffraction
12	Test 2
13	Modern Physics
14	Nuclear Reactions
15	Review
