

## ④ Hochelaga-Maisonneuve Creating local synergies for community food procurement

Borough

Food procurement

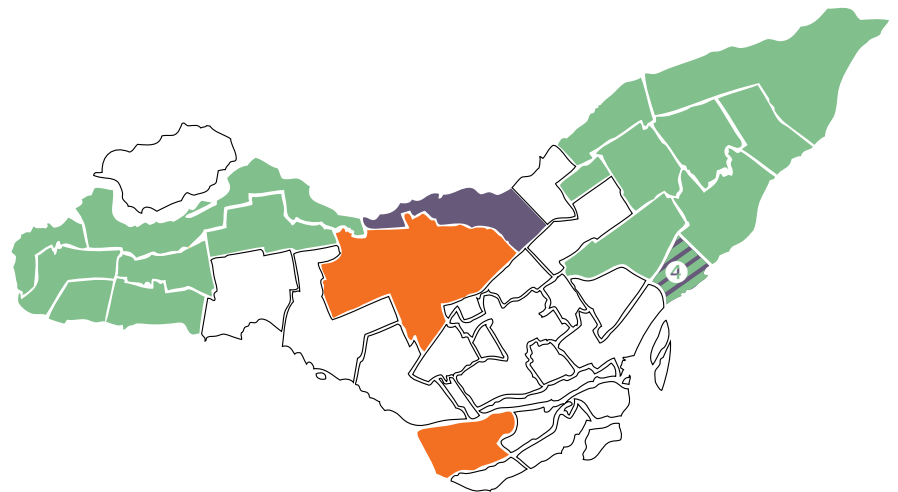

Survey

### About the tool

- Hochelaga-Maisonneuve is historically a working class borough with an established community network.
- To address food insecurity and align initiatives, the community partner wanted to create an inventory of existing infrastructures managed by the community sector: kitchens, trucks, storage.
- In this case, the roundtable reviewed and vetted an existing survey.
- The project will help to get a sense of the many emerging initiatives and their assets in the neighborhood .
- The questionnaire could be used by any network that wishes to do an inventory of their resources and aims to streamline services to the community and improve collaboration between groups.

“All of this knowledge will allow us to better align ourselves with the projects that are emerging in eastern Montreal.”
