

**Progress notes:**

**On this side of the page, think about why you decided to do, or not to do something. In other words – What were you thinking? What information led you to make this decision? On the other side of the page, you'll find some more questions which might help you to clarify your thoughts.**

## **Cues**

- Observations
- Statements from patients or others
- Laboratory and assessment data
- Atypical responses/behavior/data
- Intuition

## **Judgments**

- What could be happening?
- What data/evidence supports this?
- Do I need more information?
  - From whom?
- Whom should I involve/consult?
- What priority does this have?

## **Decision(s)**

- Should I wait and watch?
- Should I try something?
- Should I inform someone?
- Should I involve or consult someone else?
- How will I know if I made the best decision?

## **Evaluation of outcomes**

- Did the decisions achieve what I wanted to happen?
- Should I make another decision?
- Should I collect more information?
- Whom should I involve or consult?
