## 570-47C-DW/01 Product Ergonomics - Term 4

## **PROJECT 2 SELF EVALUATION**

Name:
EXPLANATION
With the conclusion of the project, you are being asked to evaluate yourself regarding the undertaking of the project. You will need to write statements supporting the numerical grade values that you assign to each component. This evaluation carries a weight of 5% of the total course grade. Consider each response and be honest with yourself and your answers. There are no right or wrong answers. Self-reflection is a valuable way for you to evolve and expand your understanding of both yourself and the methods and challenges of product design development. Continue writing on other side of page if required.
SELF EVALUATION
OVERALL HOLISTIC EVALUATION / 5
1. In general, how do you feel that you performed with this project <u>overall?</u> What grade would you assign yourself on a scale of 1 (low) to 5 (high)? Please give reasons supporting your answer and grade selection (out of 5).
2. How satisfied are you with the outcome of the project (your design, presentation, and model(s))? Explain.
3. How would you rate your experience, now that you have completed the project?

## RESEARCH COMPONENT How comfortable were you with having to research background information regarding your project's subject? Did you find it a challenge? Why? DESIGN INTENT & CONCEPTS 1. From your research, dimensions taken from sample product(s), and survey feedback, were you able to synthesize the information together into a design intent that you felt would add value in some way(s) to your design concept(s)? 2. You generated numerous concepts. How do you feel that you did with creating your concepts? Did you find it to be challenging? Did you enjoy the process? From this project experience, how do you think that you might work on concept generation in the future? TIME MANAGEMENT 1. Throughout the duration of the project, do you feel that you were able to manage it to your satisfaction from phase

to phase within the time allotted? If 'yes', why? If 'no', why not?

2.	Based on your answer to number one above and your experience, what would you do differently to improve
tim	e management if you were to do the project again?
ΟI	ITCOMES
	JTCOMES
	JTCOMES  Practice writing clearly and freely.
<ol> <li>2.</li> </ol>	Practice writing clearly and freely.
<ol> <li>1.</li> <li>2.</li> <li>3.</li> </ol>	Practice writing clearly and freely.  Provide self-reflection about the project and the progressively more complex experience of designing produce instructor with the opportunity to identify and resolve questions or problems and to discuss course
